

Kosen Rufu

Now that we have truly entered this dreaded age of MAPPO, Soka Gakkai has disqualified itself from being in any way representative of Nichiren Daishonin's Buddhism.

Why? Because SGI embraces misleading philosophies and erroneous teachings. "Climate Change", The UN 2030 Agenda, The World Economic Forum and the WHO to name a few.

Members' questions are ignored and the questioners are accused of 'slander' and vilified. There is no longer any emphasis on Daimoku, or studying the teachings of Nichiren Daishonin, instead the New World Order agenda is promoted in preference to the true teachings of Buddhism.

Daisaku Ikeda, the Buddha for this age, has had his life's work plagiarised and distorted in an attempt to utilise the support of his followers to believe in the evil agenda. His words have been twisted and misquoted. Supposed messages of encouragement have been attributed to him that he could never have said or written in order to mislead and brainwash sincere believers. The SGI organisation continues to encourage the notion that he is still alive and active when in fact he has not been seen for the past twelve years. Can you imagine how Nichiren Daishonin would have acted in the face of such scandalous behaviour? Even were he on his deathbed, I believe he would protest loudly in the face of such slander and lies.

Unfortunately, the corrupt 'leaders' of SGI have all but destroyed the original aims and purpose of the movement for peace, education and culture. The vast majority of members worldwide have been misled and brainwashed and are virtually incapable of working for kosen rufu.

So the great mission for Kosen Rufu is now in the hands of a newly emerging group of 'bodhisattvas', many of whom are not yet even aware of Buddhism. Ordinary, but awake citizens around the world who can see what's really going and who are not prepared to allow it. These people are the true bodhisattvas for this time. These warriors for truth, who at great personal risk put themselves directly in the line of fire via social media, organised protests, petitions, simple word of mouth, taking action day by day, to defend the dignity of life and the freedom of us all. Let's have a campaign of support for these, our true friends and companions. Let's chant for their continued energy and protection. If they chant Daimoku, so much the better. Through our support, this movement will bring about the change that the world is so desperately in need of.
